RICHMOND TERMINAL

The Terminal newspaper honestly works for the best interests of the taxpayers and works for more industry and Richmond pay rolls.

VOL. XXV

RICHMOND, CALIFORNIA, FRIDAY, JULY 4, 1930

No. 27

Change in Venue Again Sought by Litigants

New Proceedings Are Started by Parr Terminal

San Francisco, July 3.—The 4-year-old damage suit of the Richmond Terminal Co. against the Parr Terminal Co. (the City of Richmond), members of the City Council who were serving at the time, and other city officials, started new proceedings Thursday in the Superior Court of San Francisco, when attorneys representing the City and Parr again appeared to argue a motion for a change of venue to have trial of suit changed from San Francisco Superior Court to the Superior Court of Contra Costa County.

Suit was brought after the original Richmond Terminal Company, with Zenger at its head, was ousted by a shotgun squad from the outer harbor terminal by the Parr Terminal Company, following the granting of a 50 year lease on the property.

The City and Parr contest the suit on the ground that the contract between the city and the Richmond Terminal Co. had expired prior to rejection.

That "Summer Slump" Is a Myth

With the aid of newspaper advertising many businesses have transformed the "summer slump" into a "summer boom." They have produced goods, the public needs and wants during the warm months and have carried the news to consumers through advertising.

Those who have something to sell, locally or nationally, will neither see or feel this mythical summer slump if they do more and better advertising. There is more enjoyment and therefore more money in circulation during June, July and August than during any other three months of the year. Why then should there be less business?

Laura H. Ryan, Real Estate

Sheriff 36 Years; Why Not Make It 40?

Sheriff R. R. Veale, said to be the oldest sheriff in the United States in point of service, now completing his 36th year in office, but in ring, will be a candidate again to succeed himself, and there is no logical reason why he should not win and make it an even 40.

Efficient, trained in criminology, a 100 per cent citizen and one of the state's best known and active boosters, why not keep the little general on the job until he "strikes out?"

Northern Railroad Man Appointed

The appointment of Arthur L. Scott, to be general passenger agent of the Great Northern railway in San Francisco, is announced. Scott comes to San Francisco from Seattle, where he was passenger agent.

Oakland Charter Being Overhauled

Oakland, July 5.—Appointment of a committee of 21 to prepare an analysis and report on the proposed city manager amendments to the city charter was confirmed Thursday by Oakland city council. M. C. Chapman is chairman and Augustin Donovan vice chairman.

Page Wins the Curtiss Marine Trophy

Of supreme interest to both Norwegians and foreigners is an outdoor museum of ancient arts and crafts at the nearby village of Malhaugen. City hand-built farmhouses, mills, workshops and huts were purchased, moved to town, community, and enriched with collections of old Norwegian handwork. There are articles of wood, brass, leather and iron, together with examples of weaving and embroidery typical of the products of these handicrafts carried on by farmers of the neighborhood during winter evenings. Here are also the spinning wheels, looms and tools used in the introduction of factory work. During tourist season provision is made to have artisans actually working at loom and forge so that many of the country's historic handicrafts and crafts may not entirely die from the earth.

The TERMINAL

Restoring the Glories of Ancient Greece

The north side colonnade of the Parthenon at Athens has been completely restored, due to the initiative of Dr. John Finley of New York, and to the funds which he raised in the United States for the purpose. The photograph shows the whole monument after it was restored.

Tight Game Between Druids and Bees

The ball game Sunday morning at Memorial park, Albany, when the local Maccabees and Druids contested for baseball supremacy, was one of the exciting games of the season, and those who missed seeing the contest have their regrets. It was a fine game.

Clifford Mattos pitched for the Bees and Frank Peacock occupied the mound for the Druids. For five innings not much was made of either pitcher, and not a run until the last half of the 6th when the Bees tumbled and let in a run, and lost the "old ball game." Mattos and Peacock did excellent work and mowed down the batters in clockwork precision. The attendance was estimated at less than 500.

Hayward Tax Rate

Hayward July 5.—This city has raised its tax rate ten cents, the rate now being \$1.20. The raise was due to revenue required for library and city hall bond interest.

Former Engineer Elected

George H. Wilhelm has been elected vice president of Oakland public works commission.

Rainfall Below Normal

For three consecutive seasons the rainfall has been below normal in California. The precipitation this year was 16.28 inches; last year 15.3.

HORSESHOE CHAMP

Representative Fred G. Johnson, Republican of Nebraska, who won the congressional horseshoe pitching tournament in Griffith stadium, Washington.

Look Out For Children Playing On Street

Extra precaution should be taken by drivers, this being vacation time for school children. The streets in a number of localities being used for playgrounds. A number of children have been injured since vacation started by children chasing the ball into the street, or in other ways that invariably puzzles the driver, not knowing which way they may turn. When children are playing in the street, drive slow, and give them the best in due time. Safety first.

Street Widening Not So Urgent

Street widening in Berkeley approaching the Albany line on the south is nearing completion. The job is a good one and has improved the appearance of San Pablo avenue and made room for traffic that is highly appreciated by the public. Albany will in time have the avenue widened through the city, but it may not be so urgent at this time except in the congested intersections.

Those Were the Days

Up in New York state the old fashioned way meter used to get a good record on high grade whisky to keep it warm during the winter months. Rochester officials of the New York State Electric and Gas corporation discovered this while delving thru some old records. They got the shock of their lives to discover an item: "Whisky for meters, \$42.50." Veteran employees explained that early day meters contained liquid and whisky was used as an anti-freeze solution.

Cheaper'n Walkin'

Thirteen cent signs are now to be seen along the highways and lanes of travel. Gas at 13c is an inducement to buy a car.

Welfare League

Community welfare league has elected George F. Black, president, Charles Hunt vice president, A. A. Hughes secretary and Fred Caudle secretary.

Rural mail carriers of California held their annual convention in this city Friday and Saturday.

More than 60 aliens were deported Tuesday, bound for Europe. They were a mixture of undesirable.

Albany Woman Held Up at County Line

One of Albany's first holdups in many months took place Tuesday afternoon, when two men entered the rear door of Mrs. Chandler's restaurant at the county line, held her up and stole \$81 from the cash register.

Threatening her with a "gat" if she made an outcry, the thugs fled to the floor behind the counter. The rest was easy for them. One stood on guard at the door to prevent any intrusion until the job was completed.

After leaving the place the woman screamed, and soon a crowd congregated and she was released. Her description of the thugs was accurate. It is believed the holdups will be taken in by the police, who have already arrested one man on suspicion. The men were described to be about 30 to 35 years of age.

BOONE NOW CAPTAIN

A new portrait of Joel T. Boone, personal physician to President Hoover, made since he was promoted to the rank of captain by the Chief Executive. Captain Boone is a native of Pennsylvania and has been in Washington since 1921 when he was appointed medical officer aboard the Presidential yacht Mayflower. He is the only medical officer in the navy entitled to wear the Congressional Medal of Honor.

What, Careless?

The per capita cost of fires in the United States is at least three times that of any other country. The average annual loss during the last five years has been well over \$200,000,000.—Country Home.

Oakland to Recover Her Waterfront Lands

Concord's Celebration One of County's Greatest

Concord, July 4.—Concord's second annual "International Pageant" started last night at 9:30 and is going strong today, the celebration to close Sunday night, completing one of the best four days programs of this character ever staged in the county.

Today's program, July 4, is the big attraction, starting with a monster parade and pageant in which more than a dozen floats will be entered, as well as drill teams and many civic, fraternal, and social organizations will participate.

Mayor James Rolph of San Francisco crowned the Goddess of Liberty at 9:30 Thursday, at the opening of the celebration, the official start.

Baseball, band concerts, fireworks, races, and all the major attractions that go with a Fourth of July celebration will be on the program and carried out on a large scale.

The entire county and bay districts are well represented and the attendance exceeds all expectations.

Concord's celebration attracted many from distant points, and not a few candidates and notables were present.

Mayor James Rolph crowned the Goddess of Liberty, and the Little General headed the parade. Two of California's popular and progressive citizens, are Rolph and Veale.

Thomas D. Johnston delivered the oration, and did it in that way so characteristic of Tom, who can make the "eagle scream" on these occasions.

Wilson Attends Celebration

Aubrey Wilson, candidate for reelection as county coroner, was a guest of the committee in charge of the Concord Fourth of July celebration at the opening exercises held Thursday evening. Wilson remained in Concord until Thursday afternoon, taking a prominent part in the 4th parade in the morning. Before returning to Richmond he visited friends at Cowell.

Parr Terminal Co.'s Lease May Not Hold

Oakland, July 3.—Contending that land in question is needed for proper development of the outer harbor, the Oakland Port Commission has advised for termination of the Parr Terminal Company's lease on 2008 feet of waterfront on the western waterfront.

The move is a legal step preliminary to cancellation of the Parr lease within a year, as is provided in the lease contract, port officials announced.

The lease provides that the Parr firm hold the land "subject to the requirements of public use." Port officials insist that the "requirements of public use" in the increase of shipping now demand public development of the land now held by Parr.

Money spent in developing the holdings has been refunded by the city, in accordance with terms of the lease, according to officials. There is no connection between termination of the lease and the Parr suit against the city to recover money spent in developing waterfront lands, port officials say. The lands involved in the suit are east of the frontage which the port department wants vacated.

Albany Girl Touring Europe

Miss Adelaide Hanscom, daughter of Mr. and Mrs. A. P. Hanscom of 1017 Kains avenue, who is touring Europe, arrived in London on Wednesday, according to a cablegram received by her parents. She reports good health and a good time.

Apricot Market Dull

San Jose, July 4.—Apricots will bring only one half the price paid last year, according to the announcement of the California Packing association. Choice fruit is quoted at \$42.50 per ton; smaller lots at \$21.50.

THE PACIFIC TELEPHONE AND TELEGRAPH COMPANY

More and more, people turn to the Telephone

SINCE 1900 the number of annual telephone conversations in the United States has grown more than 900 percent.

Our task is to keep in advance of the demand for telephone usage.

The service is better today than ever before. It will be still better tomorrow.

CALIFORNIA NEWS REVIEW

Eureka will make an attempt to win the next convention of the county surveyors of California.

Approval of the new Humboldt County hospital was given by the board of supervisors recently.

The Humboldt County Young Men's Christian Association opened its annual summer camp at Redway, with C. E. Morrow, secretary, in charge.

Closed 40 years, the once famous Cherokee quartz mine at Angels Camp will be reopened. It has been taken over by L. Munson, who has started a crew cleaning out the old shaft.

James C. McGeehan of Walnut Creek has been awarded the contract to raise the old Livermore high school building. After the removal of the building the ground will be sold by the school board.

There is no need for Porterville residents to walk if they prefer to ride. Figures just released at the office of the city clerk list 2,484 motor cars for a population of 5,367, virtually one car for every two residents.

In its program of keeping down dust on heavily traveled highways the State Department of Public Works has awarded contracts for dilling nearly forty miles of road in San Luis Obispo, Sonoma and Mendocino counties.

Work of remodeling the Vallejo Theater is under way, under the supervision of L. S. Hicks, Vallejo contractor. The Fox West Coast Theaters intend to spend in the neighborhood of \$13,300 in the rebuilding of the structure, which was destroyed by fire during the early spring.

The Jackson-Markerville road over Carson Pass, Alpine County, at an elevation of 8,600 feet has been opened to traffic according to the state division of highways. In view of the heavy late snows, this was considered an early opening. The road will be left open on Saturday nights and Sundays.

Trout planting of the many mountain streams in Santa Cruz County has started and 10,000 trout from the Brookdale hatchery were planted in Mill Creek recently. About 300,000 good sized trout were in the hatchery at Big Creek and Brookdale and will all be planted soon with the help of sportsmen's organizations.

Wild horses, increasing to such numbers in the Modoc National Forest that they have become a menace to domestic stock, faced an ignominious end. They are being rounded up by riders under the direction of F. H. Huffman, manager of the SX ranch, and many of them will be shipped to Potlatch where they will be served as chicken feed. Some of the best animals in the wild herds will be claimed. Many are advertised for sale under the state stray law.

California was \$5,000,000 poorer to day as the result of a State Supreme Court decision. The court ruled that the Southern Pacific's lines in Alameda County are street and interurban lines and can not be taxed by the state on the basis of their being part of the steam railroad system. Under the 1921 King tax bill, the tax on steam roads is 7 per cent of gross earnings, while the tax on street railroads is only 5 1/2 per cent. The difference in the tax amounts to \$5,000,000, which the company has not paid.

For the first time in trout hatchery operations by the state of California, Tulare County fish are furnishing their own eggs for the purpose. Half a million rainbow trout eggs will have been taken from 595 fine specimens trapped in Hamilton Lake as the result of co-operation between the national park service and the State Fish and Game Commission. Thus far 45,000 eggs have been taken for hatching at the state hatchery east of Visalia.

The phrase, "streets of gold" has a literal meaning when applied to Nevada City. During excavation for the erection of a power pole at the main junction of streets in the business section, a highly mineralized quartz ledge was uncovered by workmen. Free gold was found in the rock and only the fact that the "strike" is located in the town's main street kept miners from looting the claim. The power company in installing a new set of poles along the business section have been experiencing much difficulty with rock. Blasting has been resorted to at this particular point. It was thought that they had encountered a large boulder but the striking of high grade ore shows that they are in the bed rock and have tapped the old Nevada County ledge.

G. E. Wood, one of two full-time members of the Coalinga volunteer fire department, has been placed in charge of all fire apparatus by order of the City Council. The order followed a controversy which arose when the fire apparatus became disabled en route to a fire recently.

A five girl track team will represent Eureka at the national girls' track and field meet at Boston, Mass., in July. Funds have been offered by Eureka business men. Miss Beulah Marshall is coach of the team.

The Santa Cruz Commercial Fishermen's Association started the first move to ban commercial seining of sardines on the Santa Cruz side of the bay and are working to establish a reserve so that the fish that follow sardine for feed, such as yellow tail, skipjack, tuna and albacore, will be more plentiful.

Several positions as physicians and psychiatrist at the State Hospitals for the Insane are not only unfilled but practically without applicants, according to report made by the State Civil Service Commission. Physicians at these hospitals, it is pointed out, receive salaries ranging from \$170 to \$270 a month, with full maintenance for the physician.

Turlock's prisoners will now have to work for their board and lodging in the city jail. The city council has adopted a plan making it necessary for all prisoners to work on city projects. In addition to cutting down bills for maintenance of the jail, the plan will benefit the city treasury by fewer expenditures for municipal improvements, councilmen pointed out.

The United States destroyer Hazelwood, used for the training of Bay District naval reserve officers and sailors for the last five years, is to be decommissioned. Twelfth Naval District headquarters announced the Hazelwood will be scrapped at San Pedro. The U. S. S. Lambertson has been selected to relieve the Hazelwood, and will be overhauled and recommissioned.

Application for diversion of water from Fall Creek and South Fork Fall Creek, Nevada County, for irrigation and power purposes, is on file with the state division of water rights. The proposed water project calls for construction of a concrete dam, 20 feet high and 150 feet long; construction of a 22,000-foot concrete conduit costing \$450,000, and diversion of 20 cubic feet of water per second for irrigation of 167,789 acres of general crops land.

Further procedure in the formation of an improvement district in Delhi land settlement colony has been taken by directors of the Turlock irrigation district. The action came with a final checkup of petitions asking for the district. Engineers were authorized to report later on the feasibility of the proposed project. The proposed district comprises 6,142 acres, 26 pumping plants and 100 miles of underground cement pipe lines, in addition to 30 miles of privately owned pipe lines.

To preserve state parks as nearly as possible in their natural state, while providing necessary highway facilities, the state division of highways is making a study of road construction in scenic areas with a view to reducing to a minimum the temporary disfigurement of the landscape during highway construction. This was announced following a conference at Sacramento between officials of the division of highways and the division of parks. In the Redwood highway many changes of highway alignment have been made to avoid destruction of trees. New cuts and fills are to be improved by replanting native vegetation.

California's water replenishment from snow and rainfall during the last winter was shown to have been below normal in all parts of the state except in a small area surrounding San Diego. In a survey just completed by State Engineer Edward Hyatt at Sacramento as a part of the statewide water resources survey. The greatest deficiency occurred in the north coast area, which was declared to be adequately moist nevertheless, and in the southern part of the San Joaquin Valley, where, on the other hand, a shortage is always a serious matter. A striking feature of the wet season as shown by the study was that the rainfall and snowfall after December 1 was practically normal in the Sacramento Valley, the northern San Joaquin Valley, the Sierra and the central and southern coastal regions. Very little rain fell anywhere in the state before that date.

With summer here and the great danger of forest fires, the United States Forest Service has completed arrangements for an airplane forest patrol. Two planes of the Associated Airways Ltd. have been engaged for patrol in northern California. These planes will not operate on regular beats but will be used for scouting. Following electrical storms and during periods of smoke and haze when visibility on the ground is poor, the planes will be used to search for fires. The planes will be used to scout large fires, and the observers will drop parachute messages to the fire fighters telling wind direction, speed of the fire and the best points to concentrate the fighters. Similar service will be provided for the forest patrol in southern California. With increasing fire hazards due to hot weather and lack of rain, the thirteen national forests in the state have been closed to smoking. Smoking will be permitted only at designated spots in the forests.

Hereafter there will not be any more burial permits issued for interments at the Carquinez cemetery on Sundays, according to action taken by the city council.

William L. Williams, who has had his headquarters at Red Bluff and at Mineral for 12 years as district ranger in the Lassen National Forest, has been promoted to district ranger of the Klamath National Forest, with headquarters at Yreka. W. J. Brokenshire will become district ranger in the Lassen forest.

New Version of Shirt-and-Shorts Combination in Four-Piece Outfit With Jacket and Wrap-Around Skirt. The Shirtwaist Dress is Desirable for Golf.

Sports Duds Are Built for Action

Shorts Have Call for Tennis and Beach; Roomy and Comfortable.

The ribbons and ruffles that adorn other kinds of clothes have no place in the wardrobe for active sports. This is one corner of the mode, observes a fashion writer in the New York Times, that has not yielded to the wave of fuss and femininity. Changed it has, to the extent of adopting fitted lines which replace the old, rather shapeless silhouette with a much trimmer one; but skirts are still short and trimmer is a restrained matter of tucking, tiny bows, applique, and the like. Sports clothes are meant for business—the pleasant summer business of swinging at a golf ball, or riding the surf, or of lining a neat forehand drive to the corner where your opponent is not. Consequently, the best costume is the one that allows the most freedom for action, without any sacrifice of becomingness, and the best accessories are your favorite elms, racquets and an ocean or two. The shirt-and-shorts combination is the most-discussed idea in 1930 tennis costumes. It was worn at Palm Beach, but will it actually appear on tennis courts when women's tennis gets underway? Remembering the furor caused by the bare-legged fad, one wonders.

Four-Piece Outfit Serviceable. One has only to glance at pictures of those natty, long-skirted tennis costumes of the '20s to realize that strange changes have happened. At any rate while the subject is still current, one may stand safely on both sides of the fence by investing in outfits like the four-piece. It is made of a novelty pique, combining wide and narrow wale, and includes not only a matching wrap-around skirt, but a jacket as well. Shorts are liked for beach wear, too.

Of course, tennis dresses will be worn by the thousands, and these have traveled a long way from the school-girl middie blouse and pleated skirt effect that prevailed not so very long ago. They are quite sophisticated. They are fitted or baggy, and they are generated sun-baked as last year's fad that is over and gone with. They consider it newer and smarter to have short sleeves than to have no sleeves at all. White is still standard for tournament play, but not everyone enters tournaments and the new pastels are lovely. Pink and blue are reported leaders, with green and yellow close behind.

The old, loose-looking dress has disappeared from the golf wardrobe, too, but the new fitted frock or three-piece suit with a long, flowing skirt is still in vogue. The new dress is a more active affair, with a long, flowing skirt, and a short, fitted jacket. The new dress is a more active affair, with a long, flowing skirt, and a short, fitted jacket.

Yachting Outfit is Simple. Yachting costumes also are effective when they are most simple. When all is said and done, people are apt to go yachting in whatever they happen to be wearing, be it pajamas or a sports frock. The navy blue jersey sweater, with brass buttons on one shoulder, and full white sailor trousers can be pulled on over a bathing suit. Paris sends us feminized yachting suits consisting of short or long daintily blue coats worn over cotton dresses.

What with the popularity of the Anithea shirt, the polo shirt and countless varieties of blouses, sweaters have lost much of their importance. In sports clothes, but now they seem to be on the way back. Quite a number of many of which imitated blouses, were shown at the last openings.

Never were sports fabrics so varied, so interesting and so practical! Besides the usual silk crepes there are quantities of models in cotton mesh, shantung, plaid and shirting, all of which tailor well, wear well and launder beautifully. Lacy jersey, boucle and flannel appear in many active

sports costumes, particularly for golf and boating. Lanvin likes to combine blazer striped linen coats with plain linen frocks for summer sports-wear. Lucile Pansy makes double-jacketed suits with inside coat of navy serge and outside duster jacket of white linen. Rodier has created this year a new tricot entirely knit of flax that constitutes a perfect summer sports material. It has been reserved by Jane Regny who uses it either alone, or combined with linen or shantung to make some of her most attractive sports costumes.

If the young campers are not thoroughly equipped for a summer in the woods, it is not the fault of stores. They have set up departments for the camp gear, and have filled them with an engaging assortment of clothes that will stand the wear and tear of every activity from hikes to canoe trips. The trouser costume of one sort or another, which young women have adopted so whole-heartedly for lounging, beach and sports, appears in smaller sizes for girls, too. To be sure, the traditional camp outfit of middie blouse and bloomers is not yet extinct. Many camps still require it, but where there is any leeway, the girls are sure to include in their trunks long white sailor pants of duck, with which they wear cotton mesh polo shirts, and shorts, which are gradually pushing bloomers out of the picture.

These junior shorts are mostly of cotton or linen, and the newest ones have zipper closings at each side. They are in all colors—the pastels, the dark blues, greens and browns, and such high, bright tones as red and orange. Linen overalls worn over a middie blouse and bloomers is not yet extinct. Many camps still require it, but where there is any leeway, the girls are sure to include in their trunks long white sailor pants of duck, with which they wear cotton mesh polo shirts, and shorts, which are gradually pushing bloomers out of the picture.

Darker Colors for Autumn. If we are to judge by the Paris mid-season, there will not be very violent changes in the silhouette of fall fashions. This is logical, for if what Jean Patou calls the woman of luxury, may permit herself to follow any and all sartorial caprices, the typically smart woman cannot be changing her skirt-lines and waistline every few months.

Colors will, as usual, grow darker as autumn approaches. Practical considerations have much weight in the orientation of the mode. Browns in their reddish and coppery tones will be the leading daytime colors for fall and winter. Long features a negro so dark it is almost black, which he sometimes amusingly combines with very pale water green or pale gray blue. He also has a lighter brown, nearly related to the color of the robe-of the Franciscan monk, though he uses it in softer materials.

Copper brown is one of the outstanding colors for Vionnet, who shows a great deal of its lightest variant, yellow natural, for her midsummer costumes. Dark myrtle green comes next in popularity, with red and the lighter and more orange reds as often seen. American beauty shades and blue in peacock, firminant and frasco tones are appearing for special costumes. The couturiers are trying hard to put over purple. An indigo purple, between blue and violet, is used by practically all of them.

The silhouette is growing more bell-like, skirts being fitted only in the hip bones, from which point they grow full to their hem, which are apt to stop about ten inches from the floor. There is, by the way, a distinct effort to unify day and evening hemlines—the former growing somewhat higher and the latter shorter. A number of costumes like Lelovs and Margy Rouff still cover the long fitted hemline, with low fullness adding to the effect of height, daintily becomingly known as it can be successfully worn by women with fuller figures. Vionnet and Louis-Boisanger on the contrary have adopted entirely unbecoming swathed effects and their modeling are uncorrected, which will reduce the disciples of feminine freedom. Worth and Martail and Armand make frocks in both styles; and the general conclusion is that women may wear whatever style is most becoming.

On the Funny Side

WHY? A woman engaged a new maid who seemed to be self-possessed and independent. On the first morning after her arrival not a sound was heard in the house, so the mistress rang the bell. There was no reply. Finally she called up the stairs: "Are you awake, Mary?" "Yes," answered the maid. "Why?"

GRASS BUT NOT GREEN

"Let me warn you of that grass widow."

"What's the necessity?" "Well, she's anything but green."

Dumbell Poems I have a very bright idea. It will work, too, I surmise. I will buy some airplane stock And then wait for the rise.

Touchy on Her Age Grandfather Jones (to aged wife)—I was a-tellin' the minister yesterday my dear, that you'll be ninety-two years old tomorrow.

Grandmother Jones (indignantly)—Well, ye had no right to say no such thing. John Jones; I only be ninety-one. Ye ought to be more keener when you talk about a lady's age.

Likely to Have a Busy Night Mrs. Rings—John, I haven't had anybody to talk to all day long today. Mr. Rings—Well, I'll be blowed! And just to think that this is my night in, too, Jane.

GREEK ARCHITECTURE

Classics—The Greeks attained the highest degree of excellence in architecture. Modernism—I know it—you oughta see the Greek's new restaurant down the street.

Turkeys and Men It is a truth beyond any man And yet truth that all men read. It is with turkeys as with men—It is always they it go to seed.

Appropriate Term "Beats, queer to speak of the diamond market." "Why?" "Stunnie, like a vegetable market." "How's that?" "Well, you see a lot of turkeys."

Be Remembered "The spirit of your departed wife wishes to speak to you. Do you want to say anything to her?" "It wouldn't do any good if I did. She always did all the talking."

In the Near Future First Group—Come on, let's hook on, hook on. The girly, girly in a couple minutes. The other one—Wait till I buckle on the parachute. He guard night thing on off.

Coloring "It is not so easy, for a portrait painter to paint the ladies these days." "Why not?" "They are using some colors that portraitists never had to use before."

Daddy's Evening Fairy Tale

By MARY GRAHAM BONNER

THE NEBULA

Harry had always wondered what a nebula was and now that he was having a trip through the sky he thought he would certainly have to find out. "Just what is a nebula, Orion?" he asked of the constellator where he was visiting. "Nebula" means a cloud. It is the Latin word for mist. There are all kinds of nebulae. Some glow from electricity nearby and others gleam with the light from the stars.

They are made up of cloudy patches and little stars. Oh, there is so much to tell you about, but I just can't resist reciting my poem to you.

"I hope you won't mind hearing it." Maybe Orion was afraid that Harry might object for he didn't wait for him to answer, but started in at once:

I'm Orion with my nebula. It's something few have got. I think just all the world of it, I really care a lot.

I do not want an airplane. I do not need a car. But I dearly love my nebula. You can see it from afar.

I let the world gaze at it. I am not mean you see. Although I cannot share it And invite you up to tea.

But oh, I wouldn't change it For anything you own. I love my handsome nebula; It's mine and mine alone.

So when you see my nebula, Admire it if you please. But do not try to reach for it And do not start to tease.

For I couldn't give it to you, I love it far too much to see. But I won't ask you for such things, Your games and books and such.

Oh, I'm Orion with my nebula. It's something few have got. I think just all the world of it, I really care a lot.

Orion paused for a moment. Then he said, "I really exaggerated a bit as it's rather difficult for your Earth people to see my nebula without a telescope. I'm so far away you see."

"But then, you'll overlook that slight exaggeration I'm sure." Harry assured Orion that he would and Orion went on to speak of his sword of stars that hung from his belt, and of the lovely family life all his stars had with such great fondness for each other.

"Look me up when you get back to the Earth," Orion urged. "Don't forget the directions. The sky equator, as it may be called, goes half way between Betelgeuse in the northern part and Rigel in the Southern.

"Rigel is south of Capella—and you'll be meeting Capella. Rigel is next to Arcturus in brightness—you'll meet Arcturus. But I am so very proud of Rigel in my left foot."

"I don't want to spoil him, but I can't help being proud of him. Such a bright, bluish white star."

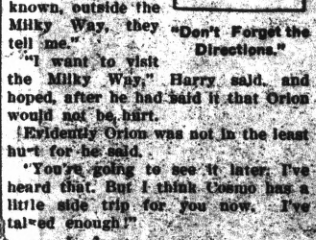

"I should think you would boast you have so much." Harry told Orion.

"And don't forget my nebula too! It's the largest known, outside the Milky Way, they tell me."

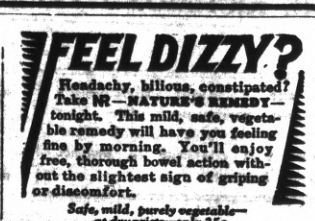

"I want to visit the Milky Way," Harry said, and hoped, after he had said it that Orion would not be hurt.

"Evidently Orion was not in the least hurt for he said:

"You're going to see it later. I've heard that. But I think Cosmo has a little side trip for you now. I've talked enough."

FEEL DIZZY?

Headachy, bilious, constipated? Take DR. RAY'S REMEDY tonight. This mild, safe, vegetable remedy will have you feeling fine by morning. You'll enjoy free, thorough bowel action without the slightest sign of griping or discomfort.

Safe, mild, purely vegetable—no drugs—only 25c. FEEL LIKE A MILLION, TAKE NR TO-NIGHT TOMORROW ALRIGHT

Monte Carlo Bathed in Light By an elaborate system of exterior illumination, Monte Carlo, the playground of Europe, has been transformed into almost a fairyland of lights. At night the famous casino is bathed in white lights and the broad avenues leading to it are illuminated. Trees, fountains and even flower pots are decorated with concealed lighting effects.

KILLS FLIES

Just spray FLY-FOIL a few times a day about the rooms—all the flies and mosquitoes disappear. Positive and lasting in its results. Not a poison. No spilling or washing. Just new FLY-FOIL pouring noise.

AN-FO MFG. CO. Oakland, Calif.

FLY-FOIL

Dairy Fly-Foil Keeps Flies Off Cows

Uplift, Stuff "What's become of Old Grandma Brown who used to sit all day knitting socks?" "Oh, she belongs to a high-tone literary club now and knits her brow in thought."

Give the Lawyer a Break Judge—And why do you think I should be lenient with you? Is this your first offense? Prisoner—No, your honor; but it's my lawyer's first case.—Judge.

Pennant Hopes? "Boss, may I get off to go to a funeral?" "Yes, bub; and I hope it isn't the home team's."

A North California lawyer has invented a photograph printing machine which he claims will produce 1,000 prints an hour.

Lots of people are seeking to do good without hoping to get famous for it.

We like traditions if they are picturesquely, but not if they are a bother.

We take the advice the lawyer gives us, but the minister can give us just as good.

When bores are denounced, we all join in, for it isn't possible that anyone will so class us.

Trouble makers are as plentiful as peacemakers are scarce.

An Old Friend In a New Dress

LEOLA E. PINKHAM'S Vegetable Compound is a low-priced, convenient, palatable, chocolate coated tablet, packed in small bottles, each bottle contains 70 tablets, or 35 doses. Carry your medicine with you.

During the three trying periods of maternity, maternity and middle age, this remedy proves its worth. 98 out of 100 report benefit after taking it. These tablets are just as effective as the liquid.

One Soap for Toilet Bath Shampoo Use

Glenn's Sulphur Soap

W. H. O. San Francisco, No. 27-1930.

Trondhjem, Viking Capital

Haying in Norway.

TRONDHJEM, old Viking capital, and the surrounding country of central Norway, recently celebrated the nine hundredth anniversary of the death of Norway's patron, Saint Olaf, the king who established Christianity in Europe's northwestern corner. The city's name was officially changed a few months ago to Nidaros, its ancient designation; but the inhabitants are not unanimously pleased with the change, and "Trondhjem" continues in partial use.

Modern Trondhjem is built on a peninsula formed by the River Nid and the Trondhjem fiord which indents Norway's west coast. Its houses are cheerful frame structures painted in white or light colors, with potted plants making colorful spots at their windows. The royal palace, a huge, white building, is one of the largest wooden buildings in the world. The shops have many unusual wares for visitors. Furs are sold and there is a demand for blue and silver fish, polar bear, and ermine. Elderdow gulls, bear skin rugs, embroidered, carved wood souvenirs, and silver carved in old Norse designs are popular with tourists. Many of the larger shops are on Olaf Trygvasson street, which was named after the town's founder.

Although it lies in the same latitude as southern Iceland, Trondhjem has summers like those of England, and its winters are no more severe than those of Germany. The river and the fiord are seldom frozen. In summer numerous trees and shrubs give the town a semitropical appearance which the visitor had not expected.

The long Arctic summer daylight has its effect on the farmlands surrounding Trondhjem. Often there are two crops a year of produce which yields but one crop in temperate climates.

Norse Coronation Place.

Trondhjem was the coronation place of ancient Norse kings; and the present king, Haakon VII, was crowned there in 1906 when the union of Sweden and Norway was dissolved. The city has a population of some 55,000. Much of its life centers about the "water front." The ship building industry is brisk and there is a boat service between Trondhjem and Bergen and the North Cape. Numerous fishing boats come in with their cargoes of salted herring to be deposited in the tall, quaint gabled warehouses which line the quay.

The lofty Gothic spires of Trondhjem cathedral rise above the surrounding low buildings of purely Norse architecture in striking contrast to them. The cathedral looks like a transplanted English church in Norse setting. Its Gothic style may be attributed to Norwegian living in England when the Gothic architecture was attaining its vogue, who preferred it to the simpler Norse style and incorporated it into the cathedral. The structure was begun during the reign of Olaf the Quiet, between 1000 and 1008. It has been restored many times but each restorer has kept to the Gothic style and the present restoration has endeavored to follow the original building.

All the excitement which marks our most generally observed holiday, Christmas, attends the fest of St. John on June 24. While it bears a Christian name, the holiday and its customs go back to pagan origins. In effect the day still is a festival of the sun. Green birch trees adorn every house and children carry evergreen branches through the streets. The analogy to Christmas breaks down, however, when younger folk crowd into boats on the fiord or hike to the mountains woods which, at twilight, are socked with bonfires. All night long these bonfires burn, as ghostly figures of the merry makers dance and sing around them.

Life in Central Norway.

Many visitors are dropping on their knapsacks for walking trips through the rugged countryside of central Norway, where every rock-hewn road seems to lead to a fjord, and the native customs defy the in-

roads of such dribbles of travel as now stir through.

The visitor goes to church, and the simple services seem stereotyped enough until a bit of statuary descends from the ceiling. The figure of an angel, supported by a rod, holds a bowl filled with water. The surprised visitor realizes this theatrical appearance is a baptismal font.

The simplicity and innocence of the country folk. In the remote and isolated sections is, betokened by their promiscuous bathing. And by "bathing" is meant just that; not the drying of water splashing and sand sunning, but getting oneself clean. A log hut is the village bathhouse. A furnace of stones is heated and water poured over the red-hot surface.

Into this steam steps a family—men, women, children, visiting relatives and neighbors. The bathers switch each other with birch twigs to induce more perspiration and gleeful throw buckets of cold water over each other when the heat becomes too intense. All of this is nothing of an orgy—as prosaic as our daily bath. The rural Norwegians would see nothing immoral nor funny in an American hotel which inadvertently advertised "1,000 rooms, and bath."

In a Vermont village each family once had its horse and buggy, a vehicle now supplanted by the automobile. In a Norway hamlet a boat is the principal family conveyance in summer. There fishing, takes the place of farming and the houses are strung around a head of a fiord instead of along a rambling main street.

Grazing herds of goats is the principal land industry of Norway's hilly north country and these flocks give rise to the picturesque goat-girl. The mountain pastures usually are far removed from the villages and each spring sees the young farm women driving their herds up the mountain paths to some lofty but sheltered valley among the glistening, snow-capped peaks. There they remain all summer long, camping in wooden huts, visited occasionally by their men folk to carry away the butter and cheese.

Goat's Cheese is a Staple. Goat's cheese, a delicious delicacy in the United States, is a principal article of Norwegian diet. It has the rich, brown color and something of the flavor of peanut butter. It is not eaten on crackers as a supplementary course but, sliced and laid on large cross sections of brown bread, is a staple of the meal.

Characteristic of inland Norway is Lillehammer which lies at the northern end of the lake, Norway's largest body of fresh water. The town is a gateway to the Gudbrandsdal. In this valley many ancient customs and costumes of the country are still in vogue. The town itself lies on the north and south rail route from Oslo to Trondhjem, and is visited annually by thousands of tourists.

This region differs markedly from the fiord country bordering the Atlantic coast and the "land of the midnight sun" which lies further to the north. In spite of its high latitude, Lillehammer enjoys a comparatively mild climate, resort hotels being open for visitors the year round.

Of supreme interest to both Norwegian and foreigner is an outdoor museum of ancient arts and crafts at the nearby village of Mithaugen. Fifty hand-built farmhouses, mills, workshops and barns were purchased, moved to one community, and enriched with collections of old Norse wooden handwork. There are articles of wood, brass, leather and iron, together with examples of weaving and embroidery typical of the products of cottage handicrafts carried on by peasants of the neighborhood during long winter evenings. Here are also spinning wheels, looms and tools used before the introduction of factory goods. During the summer season provision is made for long autumns actually working at loom and tape so that memory of the country's historic peasant arts and crafts may not entirely fade from the earth.

Lillehammer, itself, while it is the metropolis of Gudbrandsdal valley, and claims more than 5000 inhabitants, has had only a century of separate existence.

MILLET KIN BARES BIG ART SWINDLE

Grandson of Famous Painter Confesses Fake.

Paris.—Charles Millet, grandson of the painter of "The Angelus," has confessed to selling for tens of thousands of dollars to London and New York art dealers pictures falsely attributed by him to his grandfather and other great artists.

The whole collection of Millets in the famous Barbizon museum, writes Charles Millet, are also fakes.

The paintings were made for him by a skillful copyist named Capen. The investigations which brought this vast swindle to light began a few days ago. An art dealer in London applied through the Melon magistrates for the return of several genuine bronzes by Rodin which he had confided to Millet for sale and for which he had received no payment.

Police raided Millet's house in the Forest of Barbizon, where his famous grandfather had lived and worked. After a severe interrogation, Millet confessed that for years he had been exporting, principally to England and America, paintings guaranteed by him to be the works of Millet, Monet, Degas, Corot, Cezanne, Sisley and other impressionist masters of the last century.

The works sent to England and America were sold in some instances, it is understood, for sums exceeding \$50,000.

A panic is growing in the Paris art market owing to the widespread nature of this scandal. Dubious paintings by the Nineteenth century masters are being obtained at astonishingly low prices. No fewer than 4,000 forged pictures have been sold to unsuspecting dealers and collectors, state the police.

Art experts are working tirelessly, visiting collections whose owners are anxious for reassurance regarding the true value of their treasures.

Sea Lions Take Over Lighthouse in Pacific

Near Bay, Wash.—Sea lions are in command of the lighthouse on Bride's Island, northwest corner of Washington, its keeper reports. In appeal for help to rid the rocky islet of some of the mammals he relates a tale of sagacity displayed by sea lions.

When he opens the door of his quarters a troop of sea lion pups march into the room begging for food scraps. The odor of coffee and bacon attracts the adult animals from the water each mealtime. During high tide sea lions congregate about the lighthouse as to literally cover the ground and rocks.

Some climb to window ledges, sprawl along steps and chew up rope left within reach. These sea lions do not migrate, but remain in the vicinity the year round. Operation of the lighthouse is hampered by the presence of the old bulls, who try to drown out the noisy machinae.

Million for Sanitarium for Folk of Same Name

Reno.—To perpetuate the name of Kilborn, a million-dollar estate has been left by the late George D. Kilborn, Reno, publisher, for the establishment and maintenance of a sanitarium near Waterton, N. Y., where any Kilborn, no matter where he lives, may regain his health. It was announced here recently.

In the event that there are not enough persons by the name of Kilborn to fill the sanitarium, residents of Jefferson and Lewis counties, New York, who are in ill health, will be allowed entrance into the hospital. Kilborn's widow, Mrs. Katherine Kilborn, has been given use of the estate until her death, when it will revert to a fund for the endowment of the sanitarium. The will also provided a \$2,500 trust fund, that a history of the Kilborn family may be written every half century.

Pilot Saves Air Mail Before Leap to Safety

Cleveland.—Pilot Samuel Simonson, flying the night air mail from Cleveland to New York, "stepped out" of the plane near here when his engine went dead at an altitude of 8,000 feet, but not until he had turned his craft upside down to unload and save 345 pounds of mail. He was flying through a driving rain. The crippled plane was destroyed by fire. Simonson remained at the spot until within 500 feet of the ground and missed death by inches when his parachute grazed a high-tension wire.

Chicken Has Four Legs

Freeport, Maine.—A chicken at the Davis hatchery at Grover's Crossing has four legs. It struts on only two, apparently carrying the others for spare.

Mother in Will Asks Children to Gamble

London.—Mrs. Lucy Henton, who divided property worth \$200,000 between her two sons and daughter, requested in her will that they each put ten millions a year into the Casino de Monte-Carlo and asked that they may be more lucky than their mother has ever been.

WATERSPOUT MOVIES TAKEN FROM PLANE

Phenomenon Pictured From Air for First Time.

Washington.—An airplane has flown rings around a waterspout, permitting the recording of the first still and motion pictures ever made from the air of this awe-inspiring phenomenon.

The photographs of the twisting column of water and vapor were made between Miami and Havana by the seaplane survey party of the National Geographic society which is making a comprehensive aerial study of the geographic features and weather conditions along the east coast flying routes between North and South America.

Frederick Simplic, in charge of the party, describes the unusual experience in a communication to the society's headquarters here.

"Roaring across the sea from Key West to Cuba," he writes, "the giant flying boat 'Argentina' was almost in sight of Havana when a heavy rain squall suddenly blew up to starboard. The 'Argentina' was forced to turn. Then, to our amazement, the squall dropped from the north end of the storm cloud the thin, writhing black column of a waterspout. In a few seconds we were within 50 feet of the black, whirling column at least 600 feet high and probably 50 feet or more in diameter.

Written like Hugo Snaker. "At first glimpse of the ominous natural phenomenon Jacob Gayer, staff photographer, and Capt. Albert W. Stevens, noted army parachute jumper and aerial picture man, seized cameras and made for open ports. Calling Pilot Hawkins through his speaking tube, Stevens asked him to circle the spout, approaching as closely as safety would permit.

"A sinister, frightful-looking monster the spout had now become. Like a giant factory chimney linking the heavens with the sea. Then, as it grew in size and whirled and twisted, it took the shape and appearance of a great snake, spray and mist rising in clouds from where its tail lashed the sea. Yet its writhing edges were as clean-cut as a broad band of black ribbon.

"All day the sky had been overcast, the sea calm, the air supercharged with moisture. It was from a particularly black, low-lying cloud that the great spout had developed; and, as we flew round and round it, Gayer and Stevens made a series of pictures. First they shot the straight, dark descending line that marked the monster's formation; then its great twisting black bulk; and, finally, a long, grayish snake-like arm that swung off at 45 degrees its lower end now whipped out into thinning water, trailing the frayed tail of a coiled horse. By my watch it was exactly seven minutes from the time the spout first formed until it faded into the black depths of the moving squall. Twenty years ago my tramp steamer in the China seas ran from a waterspout. Now, in a plane that could fly 127 miles an hour, we impudently played tag with one—and took its picture!

Plane Skirted Dismal Swamp.

"Whizzing over Morro castle, we landed in Havana harbor in a tropical downpour, to find crowds of Cubans in sheltered places along the waterfront excitedly discussing the 'cyclone.' The only way to stop one, said an excited customs inspector, 'is to shoot it!'

"But for this amazing prank of nature, our air cruise from Washington down to Havana was without adventure. Down the Potomac the ship had flown, past Arlington, and Mount Vernon banking in a Sunday morning sun. Above the battle fleet at Hampton Roads, past Norfolk and out to sea—with the so-called Great Dismal Swamp stretching far to the west, a vast, dark blue and mysterious waste it is seen from the air, with here and there what seems to be cleared and cultivated areas.

"Towns, lighthouses, islands, rivers and estuaries slipped before the watchful eyes of our cameras. Wilmington, Charleston, Savannah, Jacksonville, lay along the path of the amphibious aerial survey which began at Annapolis, Naval base and will end in the Argentine."

Barber Still Is Using Razor 120 Years Old

Nocona, Texas.—After 120 years, during which time it has found its way from Pine Point, Ala., to this city, a razor purchased in 1810 is still in use in a barber shop here. The razor is owned by Lloyd Burdick, local barber. It was said to have been purchased in Pine Point in 1810 by Mrs. Burdick's great-grandfather. He paid 75 cents for it. The great-grandfather gave it to a son, who in turn passed it on to a third generation. Three years ago it reached the hands of the present owner, who uses it daily in his shop here.

Necktie Doesn't Fit. He Tries to Kill Self

Vienna.—When brought to a psychiatric clinic after a policeman had prevented him from committing suicide by jumping from a high window of a house, a twenty-one-year-old Viennese chauffeur, informed the hospital attendants that he had decided to kill himself because his inability to make his cravat fit correctly into his collar made him so unhappy that he would life not be worth while.

WOMAN, 97, DOESN'T WANT "LONG LIFE"

"You Get Too Stupid," She Explains at Party.

Rechester.—She has a far better chance than most persons to run off with the money, but Mrs. Sophie Reich of 225 City Street doesn't want to be one of the select few who live to be one hundred.

Mrs. Reich recently cut a birthday cake with ninety-seven candles on it at a dinner party given her by her children, grandchildren and great-grandchildren.

While flowers and greetings poured in on her she told a reporter why it doesn't "pay to live too long. "You get too stupid," she declared, adding:

"Once your faculties become imperfect you are a burden to your family, too, and I don't want to be that."

Mrs. Reich is small and dainty, the kind of old lady who looks well in a white bonnet, but she doesn't go in for that sort of thing. She was quick with a retort to every question. She doesn't need an ear trumpet and she walked about with as nimble a tread as if she were twenty.

She came to this country from Germany, a young woman of twenty-two. Mrs. Reich's husband, Christian Reich, died in 1881.

Mother Calls Her Son to Dinner by Radio

St. Louis, Mo.—"Short wave radio station DUD broadcasting. Why don't you hurry home, Wells? Dinner has been ready 15 minutes and the potatoes are getting cold. I'll wait a few moments longer for you. DUD now signing off."

Such was the broadcast from mother to son here when he was late for dinner.

Wells Chapin, instructor in a night radio school, erected DUD for research purposes—but explains his mother did much of the research for him at dinner time.

Recently Chapin hitched an aerial to the top of his automobile, set out to investigate reports of his mother that DUD was becoming weak and that she could not reach him for the usual call to dinner.

He cruised over St. Louis streets listening to his mother read from a book, recite poems, and tell how to make a "low neck dress. DUD was functioning perfectly and it was not yet time for dinner so Chapin kept cruising and his mother speaking through the microphone.

The radio instructor never thought about dinner until his mother said: "Haven't you done enough experimenting today—hurry home, dinner is getting cold. DUD signing off."

Wales Saves Digestion; Conspires With Waiters

Le Touquet, France.—The prince of Wales has confessed: He does not eat all of the courses of the many formal dinners which he is called upon to attend. He says:

"It would be impossible for me to do so. I could not stand so rich a diet. Indeed, I very often do not eat any of the elaborate dishes served."

"I have a tacit understanding with several of the waiters in the establishments in which many of such dinners are given—they know my tastes and instead of serving me with highly seasoned dishes, they give me instead a clear soup, a cheese soufflé and some cutlets."

The prince said that through this ruse he was able to eat when the others ate and at the same time preserve his digestion.

He arrived here by plane to follow the French golf championships.

French Navy Salute Center of Controversy

Paris.—The traditional shout of "Vive la République" which has been in force in the French navy since the revolution, may be changed. It is voted by the sailors when they man the decks to salute an arrival or greet a passing warship.

Certain officials of the ministry of marine sought to change the cry into a simple "burrah," as in the British navy, but ardent nationalists in the chamber of deputies are combating the change.

Chimpanzee Rides Bike

St. Louis.—"Jo-Jo" has gone in for bicycle riding. Jo-Jo is a chimpanzee at the St. Louis zoo, and she recently was presented a nice new shiny cycle. She rides it, too.

Persian Women Fined for Eyeing Own Legs

Tahrit, Persia.—A policeman arrested two women and lodged a complaint against them for standing too long in front of a shop window and looking at their legs in a mirror. The women were fined the equivalent of 25 cents each.

Really Thoughtful Act of Modern Daughter

"This is the age of selfishness," declares Kate Leo Stahl, the social worker. "Or maybe it is just thoughtlessness. I am not sure which. At any rate, the young girl of today seems to think and do everything but housework. She leaves that to mother."

"Not long ago, I was instrumental in helping a young girl get a start in life and, shortly after, when I met her on the street, I asked her how things were going at home."

"Oh, just fine," she cried. "Why, just think, last week I was able to buy mother a nice vacuum cleaner."

"That was very thoughtful of you. Yes, I guess it was. You see, mother is a little stiffened up with rheumatism and need to feel so sorry to see her trying to use a broom that I always left the house on sweeping day."—Los Angeles Times.

His Jinx Active

From now on William Higginson of Medicine Bow, Wyo., plans to walk when he wants to go any place. He recently stepped in the way of a horse's kick and emerged with a broken leg. He was placed in an automobile and rushed toward Lararule for medical attention. The car hit some loose gravel and smashed into a pole. Higginson finally reached the hospital with a broken arm to match his broken leg.

German "Luggies" Ira Scots

Loyal Scots are perturbed over the importation of "luggies," miniature milking pails used for porridge dishes for children. The "luggie" has been distinctly a Scotch institution until the death in Cumberland recently of the last luggie maker of the country. Since then Germany has been shipping into Scotland cheap imitations of the unique bowl.

Valuable Chemical

The statement has been made that barium is worth \$12,000,000 an ounce, but not because of its scarcity or value—because of the work it does. Barium is a chemical element that is used to coat the filament of vacuum tubes with a saving of \$400,000 per gram of barium used. At this rate an ounce would be worth \$12,000,000.

Man Walks 70,000 Miles

After walking 70,000 miles in the last nine years, John Shields has just retired as postman at Newton-Stewart, Scotland. His daily route covered 17 miles. He was with the post office service for 38 years, and previous to that had served in the army in India and Africa.

Musical's Creed

"Difficulties," says Musiolini, "have been more numerous in my life than the nice, happy incidents. But the latter gave me nothing. The difficulties of life have hardened my spirit. They have taught me how to live."—The American Magazine.

Time for Haste

"John, the paper says the Jenkins are back from their vacation in Yellowstone park."

"Well, we'd better hurry right over and see them before they have their flims developed."—Life.

Blundering Fool

"My husband is forty. You wouldn't believe it, but there is ten years difference in our ages."

"Impossible! I'm sure you look as young as he does."—London Tit-Bits.

Ready for Food

Walter—Haven't they given you a menu yet, sir?

Hungry Diner—Yes, but I finished that 15 minutes ago.—London Answers.

Overheard

"Oh, why was I ever brought up to be a writer?" sighed the cub to his fellow reporters.

"You weren't!" came the unexpected reply of the city editor.

Real Living Rooms

The beds have been taken out of the American living room. "Living room" now means something in our lives—Women's Home Companion.

Few people ever lost money buying real estate unless they bought too much.

All is not gold that shows up in a glittering mining prospectus.

Prevent Summer Upsets

Warm weather and changes of food and water bring frequent summer upsets unless healthy elimination is assured. You will find Feen-a-mint effective in milder doses and especially convenient and pleasant for summertime use.

Sundial Made of Cement

One of the suburbs of San Francisco has undertaken to attract some attention to itself by erecting the largest sundial ever made. It is made of concrete and its top is high above the heads of the spectators and its shadow is cast upon the ground which is marked off for the purpose of indicating the time. The inclined surface of the dial is often irreverently used by children for the purpose of a kelly slide.

Just Getting Material

American Tourist (in Shakespeare's country)—But, say—Shakespeare seems to have slept in all the cottages around here.

Cottage—Ah, sir—there worn't a more sociable young chap in the neighborhood!—Humorist.

Playing Safe

"You have an admirable cook, yet you are always growling about her to your friends."

"Do you suppose I want her lured away?"

Easy

"I just swallowed a wishbone and now I won't be able to make a wish."

"Nonsense. Just wish you hadn't swallowed it."

Hope

He—Have you learned to love me yet, Doris? She—"No, but don't give up the lessons yet."

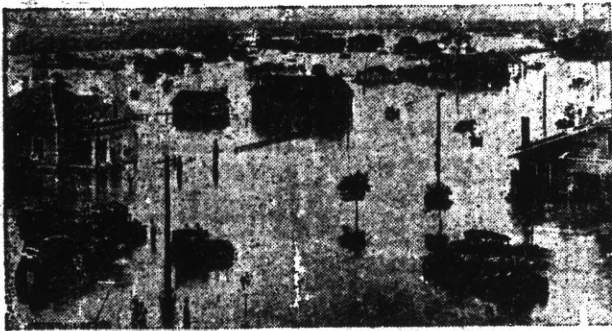

The best may err.—Addison.

Scene During the Red River Flood

Flood conditions in the Red River valley in western Louisiana have been very serious and thousands of persons have been made homeless. The picture shows a family leaving their house in a rowboat.

This Texas Town Went Wet

A view of Sinton, Texas, after a 12 1/2 inch rain fell and flooded the city and the slightly washed out railroad tracks, stopped traffic and caused other damage.

Dogs' Instincts Changed

The wolf dog undergoes a decided change of nature in the service of Uncle Sam's rangers in Glacier National park. These dogs, bred down from the wolf that attacks and kills wild deer, now haul hay on sledges to the various feeding stations where the government rangers scatter hay for the hungry deer when winter keeps only a sparse supply of natural food for them. It is related that two fawns came within "camera shot" of one of these dog-sledging trains in the mountain forest on a route with a supply of hay. These fawns followed the dogs with their burden, and the ranger reported he dropped off a large supply of hay to hold 'em while he stepped back and took pictures with a Kodak.

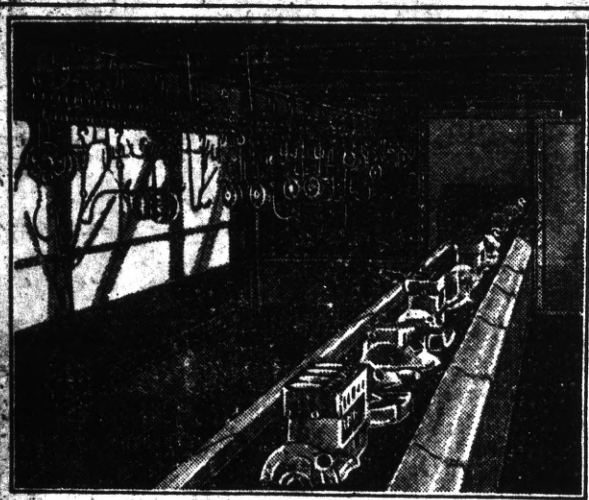

Appearance Everything

A community's appearance, in the main, determines property value and community value.

Gone to the Dogs

It was one of those houses which seem to spring up overnight. The landlord had called to collect the rent, only to be met by an irate tenant demanding a new front door. "New front door? What ever do you mean?" the landlord gasped, equally indignant. "Why, man, it's a new house." "Yes, I know," replied the tenant, "but I merely tied my dog to the door knob—a cat went by—and now we haven't got a front door!"

Miles of Conveyors in Ford Plant

This picture shows two types of conveyors in use in the Rouge Plant of the Ford Motor Company.

AN ENDLESS chain conveyor, three and a half to four miles long, still to be the longest in the world, has just been completed at the Rouge Plant of the Ford Motor Company at Dearborn, Michigan. On it parts of Ford cars in the process of manufacture are transported from one building to another and completed parts are carried direct to railroad cars for shipment to branch assembly plants. The conveyor, which carries its cargo on suspended hooks, has a daily capacity for 300,000 parts weighing over 2,000,000 pounds. It supplants freight cars and trucks which have been used for the transfer of many parts from one point to another in the Ford plant. This latest conveyor of them all is a development of the Ford policy that nothing should be done by manual labor that could better be done by machine. In the early days of his manufacturing career, Mr. Ford devised the as-

sembly line—a moving track on which cars in the process of assembly went to the workmen instead of the workmen carrying parts to the car. The assembly line, perfected in many ways, is now used by automobile manufacturers generally. The value of the conveyor in reducing physical labor, in saving time, in preserving system and in cutting costs soon became apparent and its use was extended to other purposes about the plant. Now there are literally miles of conveyors of various types in the Ford plant. Some of them carry parts from one building to another and are carefully synchronized so that the parts arrive at precisely the right moment and in the exact spot where they are needed. Others transport red hot in gots of steel weighing nearly a ton each. Still others move outgoing shipments.

If it were not for the conveyors, according to officials of the Ford Company, mass production would not be possible on its present scale.

A city of the fourth class is one that has everything a civilized community needs except a few good pitchers.—Buffalo Evening News.

Our idea of the zero point in usefulness is to be a back driver in an aeroplane.

The silver slump of China has not reached the point where it is heard that the metal is being used for ammunition by the armies. Pittsburgh Post Gazette.

The old fashioned thrifty man who used to save his money for a rainy day has a son who spends it on wet nights.—Ex.

A more powerful blend of gasoline has been discovered. This may make it necessary to have six wheel brakes instead of four.

To call floor numbers in that proposed 105-story building in New York, an elevator boy will have to be up in higher mathematics.

The more we read of Mussolini's speeches the more we are convinced that he won't get an honorary membership in Fred Libby's peace organization.—Ex.

The pedestrian who starts across the street on an orange light knows how a baseball player feels when he is caught between bases.—Louisville Times.

City Dweller Need Not Fear Loss of Hearing
A woman's club bulletin, just out, has an article on noise. The customary sort of article by somebody or other who prophesies that because of the pressure of city life, subway roar and riveting symphonies our senses are degenerating. It expresses his belief that in another 20 years Manhattanites will be as myopic and deaf as the stone lions in front of the library.

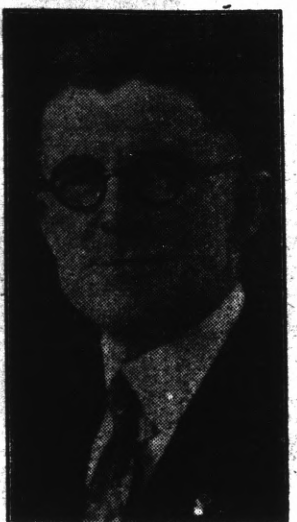

We are not alarmed, no; only bored. Nobody with sense believes anything like that. The Solomon Islanders, who listen for drums 100 miles off, are supposed to have the acutest ears in the world. Maybe, but New York has a million persons who can detect in the loudest din a click that indicates trouble in their auto engines. The Patagonian can see an ostrich head at the distance of 85 miles. But it would blind him to pore over this page for an hour, and he would see nothing but a blur. Yet a short-sighted proofreader, peering through thick glasses, could spot a single error on it in a few seconds. It would be nearer truth to say that man's senses are exactly now as they were in the Stone Age. And there is something to be said even for the subway roar. In war time we do not become shell shocked so easily.—New York American.

French Enjoy Fishing
No fewer than 10,000 fishermen took part in a competition and congress which was held at Vichy, writes the Paris correspondent of the London Sunday Observer. The number is not only sufficient to show what a placid person the Frenchman really is—at least when he reaches a certain age—but also that he has a natural passion for sport. I do not mean sport as he understands the word, for he does not really care about games, but sport in the sense of shooting and fishing. Game shooting is far more a pursuit of the whole people of France than in England, and there is hardly a middle-aged Frenchman who is not a fisherman.

Had the Wrong Girl
Telephone fact is a necessary acquiescence in these modern days, but its exercise occasionally leads to unexpected results. A recent example follows: Late at night the telephone to a home called the householder to the receiver. An obviously feminine voice was just as obviously that of a stranger. After ascertaining that the caller had been connected with a wrong number, the householder remarked: "This is exasperating, isn't it?" To his bewilderment the reply came back: "Oh, no; this is Lillian."—New York Sun.

Jas. F. Hoey

Candidate For
District Attorney
(Without Opposition)
Primary Election, August 26, 1930

It is quite unusual for a candidate for public office to cast his bat in the ring for public preference in Contra Costa and not find a competitor in the running. It is something that has never occurred in Contra Costa county very many times. A number of the old timers cannot recall a situation like the present one in political contests for office in the best county in the state, and one which politically leads them all for continuity in office.

This condition is proof positive that the people are well satisfied with the present conduct of the county's public affairs and do not favor making changes.

However, the county already has a district attorney elected by acclamation, which is convincing that he possesses the required qualifications and that he is entirely satisfactory to the majority of the people.

His knowledge of county affairs is a big asset in recommending him for the position of district attorney. Fifty attorneys in the county have endorsed him, it is said. This should be sufficient evidence that he is well qualified for the position. He should receive a fine complimentary vote by the electorate of Contra Costa county.

IF ICHABOD CRANE HAD A FLASHLIGHT

By JOHN G. LONSDALE
President American Bankers Association

WE ALL remember the story of Ichabod Crane and the headless horseman. There was the dark form by the side of the road—thundering hoofs on the Sleepy Hollow highway—and Ichabod fleeing in confused terror before this terrible monster. If Ichabod had only known that the hobgoblin was an inventive rival disguised with a pumpkin head, he would have had a good laugh and gone on with the business of vanquishing his competitor.

What Ichabod really needed was a modern flashlight. Then he would have discovered the trickery at once. Many business men need the flashlight of analysis to uncover the hobgoblins in their business and then they might sit back and laugh at their rivals who hesitate to investigate and learn the truth.

At this time, when business and banking are making strenuous efforts to have a clear vision ahead, it is especially important that the power of research and analysis be employed to their fullest extent. When these twin brothers of good management have been pressed into service in all fields, I am confident we shall see a further lessening of periods of stress. However, I believe business in general has learned the valuable lesson that any prosperity that is not lessened with a little adversity would not seem especially safe or sound.

Political Notes

Hank Stearns, old timer of Richmond, is running strong for constable, this district. Hank has lots of boosters, and is confident that the voters are going to put him over.

Supervisor Jim Long wears a smile that will not wear off—for at least four years. They say Jim is a forecaster of coming events—that he had a hunch just what was going to happen, and sure enough it did "happen."

John Moore, candidate for Justice of the Peace, is not making much noise. But that has nothing to do with his case—that of piling up votes. Often the quiet candidate "poles the persimmon."

Judge Arthur A. Ahlstrom should make a good run for the position of Justice of the Peace. He is credited with a good record, and now that the salary is to be jumped to \$350, a \$100 raise, there will be some competition. "Art" has a lot of friends who are boosting for him.

Judge Clarence A. Odell, Richmond's police judge, and who has filled that position for a number of years with due credit to the people of Richmond and himself, is out for Justice of the Peace, and out to win. He will have the support of a large clientele.

Watch The Terminal—They all read it.

John Moore

ATTORNEY AT LAW

Justice of the Peace

15th Township, Richmond

Primary Election—

TUESDAY, AUGUST 26, 1930

Hands' Changed

He was a stout man, and his feet were big in proportion. He wore stout boots, too, with broad toes. When he went into the boot shop to buy another pair, he found he had some difficulty in getting what he wanted. A dozen pairs were shown him. "No, no! Square toes—must have square shoes," he insisted. "But, sir, everybody is wearing shoes with pointed toes. They are fashionable this season." "I'm sorry," said the stout man, as he prepared to leave the shop. "I'm very sorry to have troubled you, I'm sure. But, you see, I'm still wearing my last season's feet!"—London Times.

Straight into the Heart of Vacation Land

Yosemite, Calaveras Big Trees, Murphy's Cave, Sacramento, Tahoe, Lassen, Shasta—the high Sierras to the North and East

The Redwood Empire, Eureka, and closer the famous Napa, Sonoma Valleys, Lake County to the North and West

These playgrounds are brought within a few hours of the bay motorist via

CARQUINEZ and ANTIOCH BRIDGES

How They Stand

The following is the revised to date census figures for the bay cities:

	1920	1930
San Francisco	506,676	625,000
Oakland	216,261	284,213
Alameda	28,806	34,847
Berkeley	56,036	82,000
Richmond	16,843	20,026
Piedmont	4,282	9,302
Albany	2,462	8,593
El Cerrito	1,505	3,848
Emeryville	2,390	2,333
San Leandro	5,703	11,315

DEFEATED BY JONES

Roger Wethered, crack British amateur golfer, who was defeated by Bob Jones in the final of the British amateur golf championship, over the historic course at St. Andrews. Wethered was formerly the British open golf champion.

Getting on Airman's Map

Communities that want the world to know they are air-minded—and most of them apparently have this desire—can make air-marking one of their first important objectives. Labeling the town, village, city or hamlet with its name painted in large and legible letters on the roof of the tallest building may seem rather a humble start in the direction of aviation. Far from it. "It is the easiest way to get on the airman's map," says a pilot with hundreds of hours of cross-country flying to his credit.

The Fireless City

The fire prevention idea has developed into a major community enterprise in the city of Albany, Ga., and it now enjoys the distinction of being regarded as the "Fireless City." With a population of 20,000, it has the lowest annual loss by fire of any city in the country. There were but 17 alarms of fire during 1929 and the total loss was but \$4,524. This has been accomplished by wiping out many fire hazards and by maintaining an ever-ready fire patrol nightly.

Markers on Highways

Markers describing historical points of interest for the benefit of tourists are to be erected along Massachusetts highways within a year. One hundred such markers are to be put in place as soon as possible, and plans call for the erection of 100 or 200 more later. The markers will be fashioned after those now in use throughout Virginia.

LEGAL NOTICES

SUMMONS

In the Superior Court of the County of Contra Costa, State of California. No. 16065.
Rebecca D. Leedy, plaintiff vs. Denver M. Leedy, defendant.
Action brought in the Superior Court of the County of Contra Costa, State of California, and the Complaint filed in the office of the Clerk of said County of Contra Costa.

The People of the State of California send greeting to Denver M. Leedy, defendant.

You are hereby directed to appear, and answer the Complaint in an action entitled as above against you in the Superior Court of the County of Contra Costa, State of California, within ten days after the service on you of this summons—if served within this county; or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said Plaintiff will take judgment against you for any money or damages demanded in the Complaint, as arising upon contract or will apply to the Court for any other relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the County of Contra Costa, State of California, this 5th day of April, A. D., 1930.

[SEAL] J. H. WELLS, Clerk.

By L. R. Geyer, Deputy Clerk.
C. D. Horner, attorney for plaintiff, 629 Macdonald Avenue, Richmond, California. a25-104j27
